Profile

I am a punctual, hard-working person who is eager to learn new skills. I would describe myself as outgoing and I love working in and communicating with groups of people. I really enjoy programming and often spend my free time doing side projects. I think I excel in many areas of IT and my education in Computer Science can back this up.

Objective

I am looking for a career in computer science and software development. I have a keen interest in the games industry and would like to make my own indie game in my free time in the future.

Education

Sheffield Hallam - BSc Computer Science for Games	Currently Studying (Since Oct 2019) Here, I had the opportunity to write a PS4 renderer from scratch. This included creating my own system to display sprites and UI, gameplay elements and playing audio. Our group's game was nominated for an award, and we hope to publish it one day.
Dronfield Henry Fanshawe School (A levels)	Mathematics (C); Computer Science (C); Business (E)
Westfield School (GCSEs)	Mathematics (A); English Language (C); English Literature (B); Biology (B); Chemistry (A); Physics (B); Computer Science (A); Engineering (L2 M); Spanish (C)

Work Experience

3Squared   July 2021 & Aug 2022

At 3Squared I worked as part of the small mobile dev team to create mobile apps for use in our clients in the rail industry. As part of my placement, I created a tableview app that uses the Github REST api to pull a given repo and display it in coredata and the tableview.

I was also given the task of maintaining one of our apps alongside another developer, as well as being given the task of updating one of the older apps to include more features as requested by the client.

Programming Experience

- o Python (3 Years)
- o C++ (4 years)
- o C# (4 years)
- o Swift (1 year)
- o Lua (currently learning)

Other Details

Interests: Playing videogames; I am a huge fan of JRPGs and RPGs in general, going on walks, working out, going out for meals, spending time with family and friends.
